v17.4.1	Notifications	Settings	Toggle Toast Custom Position	True/False		Event fires when the user toggles Custom Position on or off in Notification Center settings.	N
v17.4.1	Notifications	Settings	Set Toast Custom Position			Event fires when the user successfully sets a custom toast position in Notification Center settings.	N
v17.4.1	Notifications	Settings	Mute Application	<Application Name>		Event fires when the user toggles an application to mute it in Notification Center settings.	Y

v17.4.1	Notifications	Settings	Unmute Application	<Application Name>		Event fires when the user toggles an application to unmute it in Notification Center settings.	Y
v17.4.1	Notifications	Sticky Toast Header	Select Needs Attention			Event fires when the user selects "Needs Attention" in the control bar above a stack of sticky notification toasts.	N
v17.4.1	Notifications	Sticky Toast Header	Select Dismiss All			Event fires when the user selects "Dismiss All" in the control bar above a stack of sticky notification toasts.	N
v17.4.1	Notifications	Toast	Show Toast	Sticky/Transient/None		This is a system-generated event that fires when the user receives a notification of any kind.	N
v17.4.1	Notifications	Center	Select Category	<value selected> (Inbox, Sender, None)		Event fires when the user selects a filter option (All, Needs Attention, Group by Sender, etc.) in Notification Center.	N
v17.4.1	Notifications	Center	Select Sort	<value selected> (Newest, oldest, None)		Event fires when the user selects a sort option (Newest, Oldest, Highest Priority, etc.) in Notification Center.	N
v17.4.1	Store	App Grid	Select Primary Button	<button label>	<item name>	Event fires when the user selects a primary button in the App Grid in Store.	N
v17.4.1	Store	App Grid	Select Secondary Button	<button label>	<item name>	Event fires when the user selects a secondary button in the App Grid in Store.	N
v17.4.1	Store	App Preview	Select Primary Button	<button label>	<item name>	Event fires if the user selects the Primary Button in the App Preview page in Store.	N
v17.4.1	Store	App Preview	Select Secondary Button	<button label>	<item name>	Event fires if the user selects a Secondary Button in the App Preview page in Store.	N
v17.4.1	Store	Landing	Select Primary Button	<button label>	<item name>	Event fires when the user selects a primary button in the Landing Page in Store.	N
v17.4.1	Store	Landing	Select Secondary Button	<button label>	<item name>	Event fires when the user selects a secondary button in the Landing Page in Store.	N
v12.6.6	Notifications	Toast	Hover			Event fires when the user hovers over a Notification Toast.	N
v12.6.6	Notifications	Notification	Hover			Event fires when the user user hovers over a Notification in Notification Center.	N
v17.4.1	Notifications	Toast	Select Reminder Button		Notification ID	Event fires when the user selects the Reminder button in a notification toast and expands a dropdown menu of Reminder options for that notification toast.	N
v17.4.1	Notifications	Notification	Select Reminder Button		Notification ID	Event fires when the user selects the Reminder button in a notification in Notification Center and expands a dropdown menu of Reminder options for that notification.	N
v17.4.1	Notifications	Toast	Select preset Reminder	<Timestamp of Reminder>	Notification ID	Event fires when the user selects a preset Reminder timespan in a notification toast.	N
v17.4.1	Notifications	Notification	Select preset Reminder	<Timestamp of Reminder>	Notification ID	Event fires when the user clicks on a preset Reminder timespan in a notification in Notification Center.	N
v17.4.1	Notifications	Toast	Set Custom Reminder	<Timestamp of Reminder>	Notification ID	Event fires when the user successfully sets a custom Reminder on the Notification Toast.	N
v17.4.1	Notifications	Notification	Set Custom Reminder	<Timestamp of Reminder>	Notification ID	Event fires when the user successfully sets a custom Reminder on the Notification in Notification Center	N
v12.6.6	Notifications	Notification	Cancel Reminder		Notification ID	Event fires when the user cancels a Reminder on a Notification in Notification Center.	N
v17.4.1	Dock	Workspace Section	Move Workspace Section	<item name>		Event fires when the user rearranges the order of the Workspace Component shortcuts in Dock.	N
v17.4.1	Dock	Custom Section	Move Custom Section	<item name>		Event fires when the user rearranges the order of the Custom Shortcuts in Dock.	Y

v17.4.1	Notifications	Toast	Select Container Fragment	<Title of Container>	Notification ID	Event fires when the user selects a container fragment in a notification toast.	Y
v17.4.1	Notifications	Toast	Select Text Fragment	<Label used for text>	Notification ID	Event fires when the user selects a text fragment in a notification toast.	Y
v17.4.1	Notifications	Toast	Select Image Fragment	<Image URL>	Notification ID	Event fires when the user selects an image fragment in a notification toast.	Y
v17.4.1	Notifications	Notification	Select Container Fragment	<Title of Container>	Notification ID	Event fires when the user selects a container fragment in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Select Text Fragment	<Label used for text>	Notification ID	Event fires when the user selects a text fragment in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Select Image Fragment	<Image URL>	Notification ID	Event fires when the user selects an image fragment in a notification in Notification Center.	Y
v17.4.1	Notifications	Toast	Select Form Dropdown	<Value>	Label of form field	Event fires when the user selects an option from the form dropdown in a notification toast.	Y
v17.4.1	Notifications	Toast	Enter Form Text Input	<Value of text input>	Label of form field	Event fires when the user loses focus on the text input field in a notification toast.	Y
v17.4.1	Notifications	Toast	Enter Form Number Input	<Value of number input>	Label of form field	Event fires when the user loses focus on the number input field in a notification toast.	Y
v17.4.1	Notifications	Toast	Select Form Checkbox	<Value>	Label of form field	Event fires when the user selects a checkbox field in a notification toast.	Y
v17.4.1	Notifications	Toast	Deselect Form Checkbox	<Value>	Label of form field	Event fires when the user deselects a checkbox field in a notification toast.	Y
v17.4.1	Notifications	Toast	Select Form Radio Button	<Value>	Label of form field	Event fires when the user selects a radio button in a notification toast.	Y
v17.4.1	Notifications	Notification	Select Form Dropdown	<Value>	Label of form field	Event fires when the user selects an option from the form dropdown in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Enter Form Text Input	<Value of text input>	Label of form field	Event fires when the user loses focus on the text input field in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Enter Form Number Input	<Value of number input>	Label of form field	Event fires when the user loses focus on the number input field in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Select Form Checkbox	<Value>	Label of form field	Event fires when the user selects a checkbox field in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Deselect Form Checkbox	<Value>	Label of form field	Event fires when the user deselects a checkbox field in a notification in Notification Center.	Y
v17.4.1	Notifications	Notification	Select Form Radio Button	<Value>	Label of form field	Event fires when the user selects a radio button in a notification in Notification Center.	Y
v17.4.1	Dock	Workspace Section	Select dock Item	<item name>		Event fires when the user selects a Workspace component such as Home, Notification Center, or Store, in Dock.	Y
v17.4.1	Dock	Custom Section	Select dock Item	<item name>		Event fires when the user selects any button or button dropdown in the custom shortcuts section in Dock.	Y
v17.4.1	Dock	Custom Section	Select Dock Menu Item	<item name>		Event fires when the user selects any item from the expanded menu of a button dropdown in the custom shortcuts section in Dock.	Y
v17.4.1	Dock	More Menu	Quit Platform	<platform UUID>		Event fires when the user quits the Workspace Platform from Dock.	Y
v17.4.1	Dock	Navigation	Show Dock			Event fires when the user opens or shows Dock.	Y

v17.4.1	Dock	More Menu	Minimize		Event fires when the user minimizes Dock.	Y
v17.4.1	Store	Search	Run Search	<search keyword>	Event fires when the user enters a keyword and then pauses typing for a minimum of 3 seconds in Store's search box.	Y
v17.4.1	Store	Search	Select Search Item	<item name>	Event fires when the user selects an item from the list of search results in Store.	Y
v17.4.1	Store	App Grid	Select Tile	<item name>	Event fires when the user clicks on the tile (not the primary or secondary buttons) in the App Grid in Store.	Y
v17.4.1	Store	Landing	Select Tile	<item name>	Event fires when the user clicks on the tile (not the primary or secondary buttons) in the Landing Page in Store.	Y
v17.4.1	Home	Search	Run Search	<search keyword>	Event fires when the user enters a keyword and then pauses typing for a minimum of 3 seconds in Home's search box.	Y
v17.4.1	Browser	Page Modal	Select Discard Changes	<page name>	Event fires when the user selects "Discard Changes" in the modal that appears when the user tries closing a page with unsaved changes.	Y
v17.4.1	Browser	Page Modal	Select Save As	<page name>	Event fires when the user selects "Save" in the modal that appears when the user tries closing a page that has never been saved before.	Y
v17.4.1	Browser	Page Modal	Select Save	<page name>	Event fires when the user selects "Save" in the modal that appears when the user tries closing a saved page that has unsaved changes.	Y
v17.4.1	Browser	Page Modal	Select Close	<page name>	Event fires when the user selects "Close" in the modal that appears when the user tries closing a page with unsaved changes.	Y
v17.4.1	Browser	Window	Maximize Window	<window name>	Event fires when the user maximizes the Browser Window.	Y
v17.4.1	Browser	Window	Restore Window	<window name>	Event fires when the user restores the Browser Window.	Y
v17.4.1	Browser	Window	Minimize Window	<window name>	Event fires when the user minimizes the Browser Window.	Y
v17.4.1	Browser	Window Modal	Select Discard All	<window name>	Event fires when the user selects "Discard All" in the Browser Window modal, which appears after the user tries closing a Browser Window with unsaved changes.	Y
v17.4.1	Browser	Window Modal	Select Save All	<window name>	Event fires when the user selects "Save All" in the Browser Window modal, which appears after the user tries closing a Browser Window with unsaved changes.	Y
v17.4.1	Home	Filter Section	Select Filter Option	<filter option label>	Event fires when the user selects a filter option in a filter category in Home.	Y
v17.4.1	Home	Filter Section	Deselect Filter Option	<filter option label>	Event fires when the user deselects a filter option in a filter category in Home.	Y
v17.4.1	Home	Filter Section	Toggle Filter Select All	True/False	Event fires when the user toggles the "Select All" checkbox in a filter category in Home.	N
v17.4.1	Home	Filter Section	Select Filter Clear All		Event fires when the user selects "Clear All" in a filter category in Home.	N
v17.4.1	Home	Filter Section	Select Filter Cancel		Event fires when the user selects "Cancel" in a filter category in Home.	N
v17.4.1	Home	Filter Section	Select Filter Apply		Event fires when the user selects "Apply" in a filter category in Home.	N
v17.4.1	Home	Provider Selector	Select Provider	<provider name>	Event fires when the user selects a Home provider in Home.	Y
v17.4.1	Home	Navigation	Select Back	<platform UUID>	Event fires when the user selects "Back" in Home.	Y
v17.4.1	Home	Navigation	Select Close	<platform UUID>	Event fires when the user closes Home.	Y

v17.4.1	Home	Navigation	Select Notification Center Shortcut	<platform UUID>		Event fires when the user selects the shortcut to Notification Center in Home.	Y
v17.4.1	Notifications	Center	Popout Stream	<stream id>		Event fires when the user pops a stream out in its own window from Notification Center.	Y
v17.4.1	Notifications	Center	Select Show All	<Notification group name> (Eg. Se		Event fires when the user selects "Show All" to expand a group of notifications in Notification Center.	Y
v17.4.1	Notifications	Center	Select Show Fewer	<Notification group name> (Eg. Se		Event fires when the user selects "Show Fewer" to collapse a group of notifications in Notification Center.	Y
v17.4.1	Notifications	Center	Show Notification Center			Event fires when the user shows Notification Center.	N
v17.4.1	Notifications	Center	Hide Notification Center			Event fires when the user hides Notification Center.	N
v17.4.1	Store	Navigation	Minimize Window			Event fires when the user minimizes the Store Window.	N
v17.4.1	Store	Navigation	Maximize Window			Event fires when the user maximizes the Store Window.	N
v17.4.1	Store	Navigation	Restore Window			Event fires when the user restores the Store Window.	N
v17.4.1	Browser	View	Focus View	<View Name>	View UUID, View	Event fires when the user focuses on a view in a Browser Window.	Y
v17.4.1	Browser	View	Blur View	<view name>	View UUID, View	Event fires when a View loses focus in a Browser Window.	Y
v17.4.1	Browser	View Section	Select New View	New View		Event fires when the user selects the plus button to add a new view tab in a Browser Window.	N
v17.4.1	Browser	Page Modal	Select Cancel	<page name>		Event fires when the user selects "Cancel" in the modal that appears when the user tries closing a page with unsaved changes.	N
